

## ASBESTOS & LEAD SERVICES

*Bridging your environmental needs.*

### Asbestos Inspections

arch environmental group was found solely on the back of asbestos consulting. The owners and professional staff have conducted hundreds of asbestos inspections for both schools and industry. Our experienced staff is also trained, accredited and prepared to assist you with any AHERA required inspection and/or management plan work as well.

### Project Management/Air Monitoring

arch environmental services is one of Michigan largest providers of on-site project management, air monitoring and sample analysis services. We can ensure all phases of your asbestos abatement project commence without a hitch. Whether it is contract administration, project oversight or daily air sampling and analysis, our staff is prepared to get the job done efficiently and safely.

### AHERA Compliance

Numerous AHERA services are available for school district compliance issues. Our accredited personnel can provide a number of "Designated Person" responsibilities such as mandatory annual notifications, awareness training, 6-month periodic surveillances and 3-year reinspections. The arch environmental group is the only company offering 3-year "AHERA Compliance" contracts ensuring all activities are complete and ensuring the lowest possible cost for compliance.

### Lead Inspections and Risk Assessments

arch environmental group is one of only several companies offering direct read lead analysis. Our XL-309 Niton Spectrum Analyzer uses X-Ray Fluorescence from a sealed radioactive source to detect and quantify lead concentrations within a specific test area. Both HUD and OSHA inspections can be conducted and risk assessments provided at your request. Where necessary, we can provide lead-paint chip sampling and analysis.

### Summary

arch environmental group provides a wide variety of asbestos and lead based paint consulting services. We can take your asbestos project from the initial inspection through the abatement process to the final project record keeping. Our asbestos inspectors can complete your AHERA inspection, reinspections and periodic surveillances activities for school buildings, as well as AHERA/OSHA formatted inspections for all types of buildings.
