

MERCURY RESPONSE SERVICES

Bridging your environmental needs.

Emergency Mercury Clean-up Services

arch environmental group's CHMM and 40-Hr. HAZWOPER Staff are experienced and trained to handle your mercury release - small or large. Our emergency response team is available 24/7 and can typically respond immediately. Don't just let anybody handle this delicate and technical situation. We have vast experience conducting mercury release responses in schools, hospitals, medical facilities, homes and industrial settings.

Mercury and Mercury-Containing Device Disposal

Let us properly dispose of your mercury-containing devices: elemental mercury from labs, thermometers, manometers, barometers, thermostats, float switches, flame sensors, flow meters, gas flow regulators and other scientific and mechanical equipment. Disposing of equipment

prior to a release will not only be a significant financial benefit but may just keep you off the nightly News.

Mercury Waste Transportation Services

Whether you have a mercury spill or just require disposal of your mercury-containing products - arch environmental group is prepared. We are one of the most experienced contractors in the State in meeting the MDCH clean-up protocols. We are also licensed throughout the Country to transport your mercury materials and waste.

MONITORING & SAMPLING

While on-site monitoring is conducted during all mercury-release projects, arch environmental group's healthAIR Division is prepared to conduct post clean-up sampling utilizing the Modified NIOSH 6009 procedures.

Flooring Materials

arch environmental group is one of only a few Contractors removing, disposing and monitoring mercury-containing seamless flooring throughout the Midwest.

Industrial/Commercial Lamps

arch environmental group can handle all aspects of your de-lamping projects for renovations or building closures. arch environmental group is prepared to conduct packaging, disposal and treatment of the following mercury-containing fixtures:

- Fluorescent Lamps
- Compact Fluorescent Lamps
- High Intensity Discharge Lamps
- Mercury Vapor Lamps
- Metal Halide Lamps
- High Pressure Vapor Sodium Lamps

Compact Fluorescent Lamps

Mercury is an essential element in the operation of all fluorescent lighting and now everybody is utilizing these new energy efficient bulbs in their homes. Arch environmental group is capable of answering your questions regarding proper handling of these material and conduct clean-up or disposal activities if requested. arch environmental group

works with community schools and leadership to provide answers and solutions to the side effects of current technology - hazardous waste. Please contact an arch representative to see how we can help.
