

# GREEN FUNDRAISING

What if you could receive a return on your recycling and raise money to support organization like the Earth Club, Band or Soccer? In addition, you can increase community awareness and provide a source for individual participation. Because homeowners and residents are not required to recycle their e-waste, they often do not have an outlet for these materials when they are looking to properly recycle. The safeEARTH Recycling Club can be set up to allow individual Community Club memberships by selling safeEARTH Recycling Coupons. These coupons allow your tax paying community to also utilize these services by dropping off materials at their closest school. Clubs, teams and organizations can sell these coupons as fundraisers while at the same time doing the right thing for our kids' futures.
